SUMMARY

Aspiring **Frontend Developer** with a specialized focus on building immersive user experiences using **React.js** and modern CSS frameworks. Proficient in transforming complex requirements into responsive, high-performance interfaces using **JavaScript (ES6+)**, **Tailwind CSS**, and **Bootstrap**. Passionate about clean UI/UX design, component-based architecture, and optimized frontend performance.

CERTIFICATIONS

AI Enhanced Full Stack Development [MERN] – Illinois Tech, US

Dec 2025 – Aug 2026

AI Enhanced Full Stack Development [MERN] – Entri Elevate

Dec 2025 – Aug 2026

- Engineered responsive user interfaces utilizing **React.js (Hooks)**, **Tailwind CSS**, and advanced **JavaScript**.
- Mastered component-based architecture and state management to improve UI modularity and reusability.
- Executed end-to-end frontend deployment, ensuring cross-browser compatibility and mobile-first responsiveness.

TECHNICAL SKILLS

Core Frontend: JavaScript (ES6+), React.js, HTML5, CSS3

Styling & UI: Tailwind CSS, Bootstrap 5, Material UI, Responsive Web Design, Glassmorphism

Tools & State: React Hooks (useState, useEffect), Context API, Git, GitHub, VS Code

Performance & Lifecycle: Lighthouse Optimization, Cross-browser Testing, Postman, Vercel, Netlify

Soft Skills: Strategic Leadership, Visual Problem Solving, Cross-functional Communication

PROJECTS

Secure User Authentication & Dashboard Interface

[Live Demo](#) | [GitHub](#)

Technologies Used: JavaScript (ES6), HTML5, CSS3, Flexbox, Dynamic Form Validation

- Developed an interactive user authentication interface utilizing native **JavaScript (ES6)** to deliver real-time validation updates.
- Engineered comprehensive client-side form logic capturing email validation, custom error handling, and robust input state monitoring.
- Manipulated the **DOM** dynamically to transition smoothly between sign-up and sign-in viewports without page reloads.
- Applied custom UI design patterns incorporating sleek **Glassmorphism** layout styles across responsive device break-points.

Mathura Academy – Course Management Web Application

[Live Demo](#) | [GitHub](#)

Technologies Used: React.js, Tailwind CSS, JavaScript (ES6), HTML5, GitHub Pages

- Developed and deployed a responsive, user-centric course-listing web application featuring a modern, clean UI designed to streamline educational content delivery.
- Implemented dynamic component rendering and optimized application state management using modern React patterns.
- Styled the platform using **Tailwind CSS**, ensuring a fully responsive, mobile-first design with polished typography and intuitive navigation.
- Managed version control and successfully configured the production build for seamless deployment via **GitHub Pages**.

Local Event Hub – Event Discovery & Marketplace Application

[Live Demo](#) | [GitHub](#)

Technologies Used: React.js, Tailwind CSS, JavaScript (ES6), RESTful APIs, HTML5, GitHub Pages

- Developed a dynamic, highly responsive frontend interface featuring a polished **Midnight Teal and Champagne Gold** color scheme built entirely with **Tailwind CSS**.
- Managed complex application state using modern React patterns to handle dynamic search queries, category filters, and persistent user "Favorites" lists.
- Engineered fluid, real-time client-side interactions including live ticket reservation states and interactive component transformations based on API data.
- Optimized production builds and maintained clean version control pipelines for seamless deployment via **GitHub Pages**.

EDUCATION

B.E. in Electronics and Communication Engineering

Oxford Engineering College

Graduated

Trichy, Tamilnadu
